Product Description

Makita 40V max ConnectX™ Brushless Blower, Tool Only

Landscapers are demanding more cordless alternatives to gas-powered outdoor power equipment. Makita is meeting demand with an expanding collection of blowers, including the 40V max ConnectX™ Brushless Blower (CBU01Z). With zero emissions, lower noise, and considerably less maintenance than gas-powered blowers, this blower is a welcome solution for landscapers.

The CBU01Z utilizes an external battery connection, moving batteries from the unit to a battery backpack (sold separately). A cable connects the unit to the battery backpack. This shift in battery weight from the blower to the backpack provides improved balance and longer run time. It can be paired with the ConnectX™, LXT®, LXT® X2 and XGT® Portable Backpack Power Supply (PDC01, sold separately), to gain extended run times.

- **POWER** : Up to 80% more blowing force than gas blower model BHX2500CA
 - **PERFORMANCE** : Makita-built Brushless Motor delivers up to 622 CFM and 157 MPH
 - **RUN TIME** : Cable connects to battery backpack for longer run time (battery backpack not included)
 - **DESIGN** : External battery connection shifts battery weight off blower improving balance and reducing weight
 - **INCLUDES** : Tool only (batteries and charger not included)
-
